Steve – did Kay attach the results from the water sample as her email states?

Dan and Paula, let me know your interest in having a call to discuss potential metals sources in the reach of the Animas that showed an increase in metals below Elk creek.

Kay,

Thanks for digging up the information in the last few days. It might be worth a short phone conversation to discuss the potential metals sources in the area. I left a message for Dan Wall about setting up a time to talk this week if possible.

I found the water sample the Wilderness Rangers took (attached). They sampled 2 locations where they were wondering if they should drink the water, so I never got a good location as to where they sampled. Sorry. this should be the Chicago Basin vicinity.
